

CORNER+EDGE BROCHURE

PACKAGING SOLUTIONS DESIGNED WITH NATURE IN MIND

HELLO & WELCOME

OUR SERVICE

At EGI we pride ourselves on the [service](#) we provide each and every customer. From product availability to packing advice and everything inbetween.

OUR PRODUCTS

We've developed our sustainable **CORNER+EDGE** range to provide reliable protection across a wide spectrum of products. Whether fragile, heavy, or high-value, our protective corners and edging are designed to safeguard goods during transit—offering a versatile solution for manufacturers and retailers alike.

OUR PLANET & US

EGI's journey began with the environment in mind. Understand how our business and products are [helping the planet](#).

Ezee Group International (better known as EGI), is a family-run business specialising in creating sustainable packaging solutions to reduce the huge impact of plastic on the environment. In the current market, developing your business to meet the ever increasing demands to be environmentally conscious, is becoming a vital part of any business plan. Our products have been created with this in mind.

In the UK, demand for home-delivery services is at an all-time high—covering everything from shower trays and bathroom units to white goods, computers, screens, furniture and framed artwork. Our protective corners and edging are designed to keep even the most delicate or bulky items safe in transit. These products vary greatly in size, shape, and weight, and often feature delicate surfaces or exposed corners that are vulnerable during handling and transport. To meet this growing need, we've designed and developed high-quality, sustainable protective corner & edging solutions—and rigorously tested them to ensure they deliver reliable protection across a wide range of white goods and appliance products.

Below is a detailed breakdown of our patent-pending **CORNER+EDGE** range, manufacturing and eco credentials, as well as the key features that make our products unique and versatile within the market place.

B CORP

We're proud to be a Certified B Corporation — and the only moulded fibre manufacturer in the UK to hold this accreditation.

RECYCLED MATERIALS

Our products actively encourage a circular economy. From responsibly sourced UK trees, to cardboard, and finally to moulded pulp.

UK MADE

All of our products are designed and manufactured in the UK, using 100% recycled UK waste material.

THE DESIGN

As specialists in the industry, EGI have over 16 years of research and development experience. Every product has been specifically designed and manufactured for the safe delivery of items through the courier networks. We work with some of the best suppliers in the industry to create packaging that will withstand the products journey from beginning to end.

All of our products are designed using the best materials, design application and manufacturing processes.

Being both soft and strong is a combination very few have mastered.

TASMIN MOGAHED

Our products are designed and manufactured to accommodate a broad spectrum of items shipped through courier networks—from computers and boilers to sideboards and granite worktops. The range is built to support a diverse mix of products, tailored to meet the varied demands of multiple markets.

For more unusual shape and size products, we offer a bespoke design service. Our in-house design team are adept at understanding our customers needs and designing custom made packaging to suit these requirements. We aim to understand your full operation which enables us to develop a product that not only enhances your offering but also saves you time, money and is sustainable to the planet.

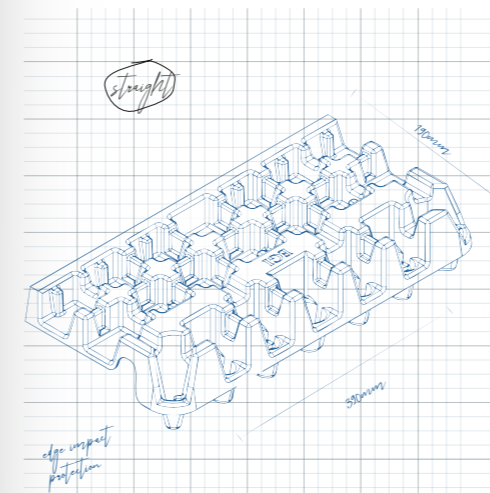

THE DESIGN SERVICE

PROTECTION

Moulded fibre pulp boasts exceptional shock-absorbing properties for effective cushioning during transportation. Our products are carefully crafted to fully utilise these qualities. Our precise designs enhance protection and offer cushioning during transit, thereby reducing costs related to returns, replacements, and customer dissatisfaction.

Our products have been designed with 4 key factors in mind, protection, cost savings, time savings and sustainability....

SUSTAINABILITY

As a sustainable material, moulded fibre pulp contributes to reducing the environmental impact of packaging. The use of recycled materials helps conserve natural resources and reduces the carbon footprint associated with packaging production. All our products are bio-degradable, compostable and recyclable, offering a comprehensive and planet-conscious solution.

TIME SAVING

We have created an easy use system, making our products quick to pack, saving you time and money. Being easy to pack; you could reduce your warehouse packaging time significantly. No need to wrap, stick, fold... the packaging on average takes as little as 1 minute! Your time is valuable, and our system is designed to help you make the most of it.

COST SAVINGS

Our products are designed to provide protection whilst minimising wasted space and facilitating efficient packing and transportation. In addition to this, our packaging is inherently lightweight. This dual focus on size and weight results in significant savings per shipment on delivery costs. This also enhances the efficiency of your supply chain, ultimately reducing overall costs.

THE EDGING RANGE

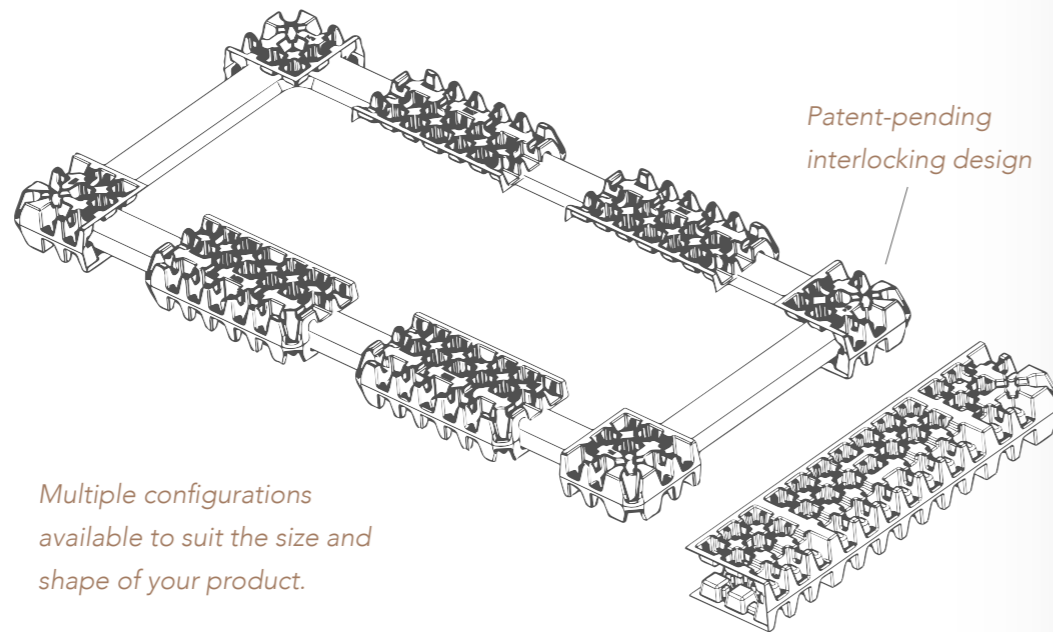

SUSTAINABLE & PROTECTIVE

Made in the UK from 100% waste materials. All products are biodegradable, recyclable and compostable. They are designed to protect an extensive range of products including but not limited to...

- ✓ Computers & Laptops
 - ✓ Screens & Monitors
 - ✓ Toasters & Microwaves
 - ✓ Fridges & Freezers
 - ✓ Washing Machines & Tumble Dryers
 - ✓ Boilers, Radiators & Air Conditioning Units
 - ✓ Granite Worktops & Bathroom Units
 - ✓ Furniture & Home Accessories
- and more...

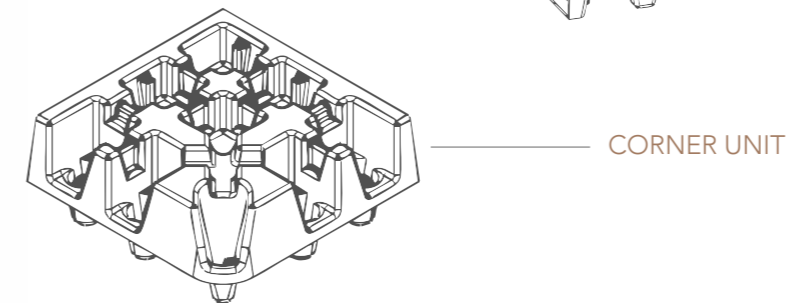

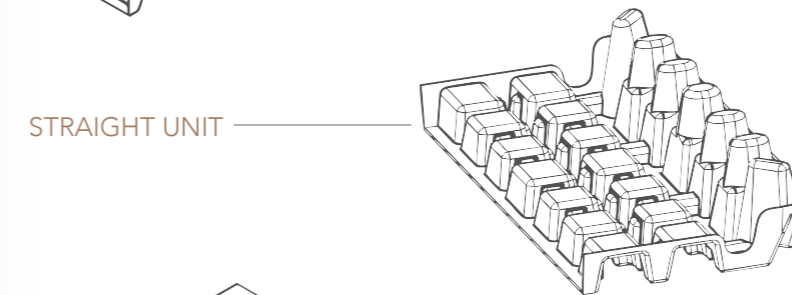

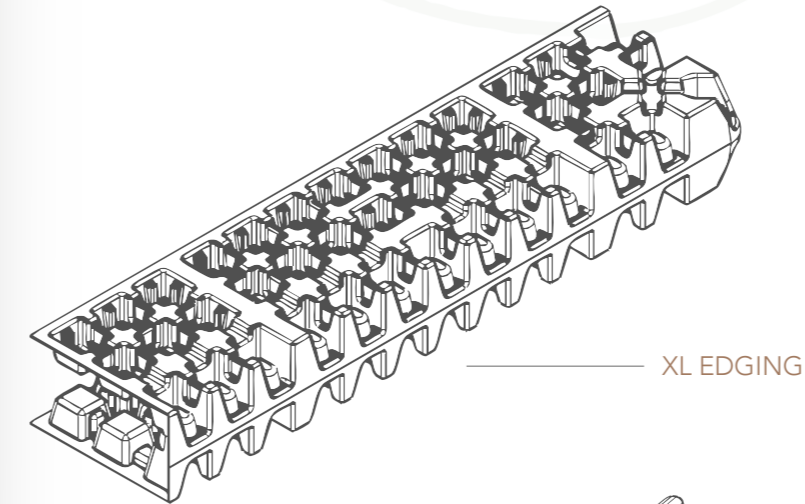

PACK IT, PROTECT IT, POUR IT...

One size does not fit all when it comes to protective packaging. This is why we consult with each customer to fully understand their products and ensure we recommend the right solution. Our **CORNER+EDGE** product range is divided into three core categories 'corners', 'straights' and a combined XL Edging unit, offering multiple configurations to provide the best protection for your products.

Multiple configurations available to suit the size and shape of your product.

PRODUCT BREAKDOWN

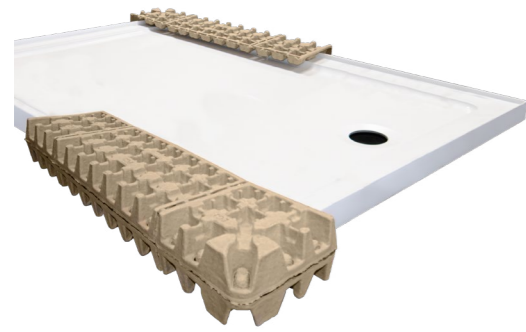

STRAIGHTS	STRAIGHT SET (TOP & BASE)	600 SETS	FULL PALLET
	STRAIGHT BASE ONLY*	600 PIECES	HALF PALLET
CORNERS	CORNER SET (TOP & BASE)	1200 SETS	FULL PALLET
	CORNER BASE ONLY*	1200 PIECES	HALF PALLET

* Mix and Match: You can mix and match these (*) products with any other half pallet to create a full height pallet. For example you can have a half pallet of 'Straight Base' and half a pallet of 'Corner Base' stacked together to make a full height pallet. Saving on delivery costs.

XL EDGING		
XL EDGING SET (TOP & BASE)	270 SETS	FULL PALLET

THE EDGING RANGE

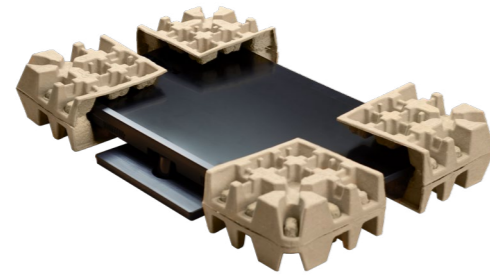

BATHROOM FIXTURES & FITTINGS

EXAMPLE CONFIGURATION

Shower Tray = XL Edging

SUITABILITY

Our XL Edging solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

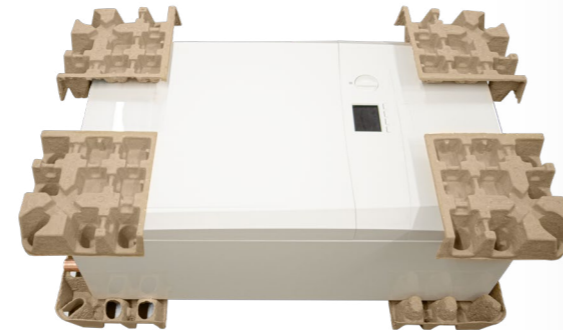

SCREENS & MONITORS

EXAMPLE CONFIGURATION

Computer Screen = Corner Set

SUITABILITY

Our Corner Set solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

BOILERS & AIR CON UNITS

EXAMPLE CONFIGURATION

Boiler Unit = Corner Set

SUITABILITY

Our Corner Base solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

COMPUTERS & LAPTOPS

EXAMPLE CONFIGURATION

Computer Unit = Corner Base

SUITABILITY

Our Corner Base solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

SMALL & MEDIUM HOME APPLIANCES

EXAMPLE CONFIGURATION

Microwave = Corner Base

SUITABILITY

Our Corner Base solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

LARGE HOME APPLIANCES

EXAMPLE CONFIGURATION

Tumble Dryer = Corner Base & Straight Base

SUITABILITY

Our Corner Base & Straight Base solution offers protection for a range of size and shape units. Tested under a static load of 500kg with no visible deformation or structural give.

PRODUCT EXAMPLES

THE EDGING RANGE

ARTWORK & MIRRORS

EXAMPLE CONFIGURATION

Large Canvas = Corner Set & Edge Set

SUITABILITY

Our Corner Set & Edge Set solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

OFFICE FURNITURE

EXAMPLE CONFIGURATION

Office Draw Unit = Corner Set

SUITABILITY

Our Corner Set solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

HOUSEHOLD FURNITURE

EXAMPLE CONFIGURATION

Dining Table = Corner Set & Edge Set

SUITABILITY

Our Corner Base solution offers protection for a range of size and shape units. Tested under a static load of 300kg with no visible deformation or structural give.

PROTECTION THAT GOES FURTHER

The examples shown in this brochure represent just a small selection of the products our range can protect.

Our moulded fibre solutions are versatile by design, and are able to offer protection for a wide variety of shapes, sizes and applications.

If you don't see your product here, chances are we can still help—just get in touch to discuss your specific packaging needs.

THE EGI SERVICE

OUR SERVICE

At EGI we value each and every customer equally. Regardless of size, each customer receives the same level of dedicated support and service. We recognise the paramount importance of high-quality products and service in the E-commerce/B2B landscape. Therefore, EGI is devoted to delivering a service that aligns with the exceptional standards you aim to provide to your own customers.

Our commitment extends beyond prompt and reliable delivery and customer service; we go the extra mile by offering comprehensive training sessions and providing informative literature and guides. Our goal is to empower our customers with the knowledge and skills necessary for optimal product usage and secure packaging. We pride ourselves on going above and beyond to support you every step of the way.

OUR PROMISE

As a company we will only recommend our packaging if we feel it is the best solution for your product. EGI operates a multi-faceted approach and will engage other specialist suppliers if we believe their products are more suitable to your operations. Whether this be in conjunction with or independently of ours.

Some of the key services we offer include stock availability, samples, advice and delivery service....

"Before working with EGI, we were using plastic packaging to help deliver goods to our customers, so are very happy to have found a sustainable and innovative packaging solution that performs much better."

CERTIFICATIONS & COURIER APPROVALS

At EGI, we prioritise reliability and durability in everything we create. All our products undergo internal drop testing to ensure performance. If you require additional certifications or specific testing, we're happy to work with you to meet those requirements.

With over 10 years of experience, EGI has a proven track record of producing strong, dependable packaging. Our products are trusted by a wide range of courier networks, and we are a **DPD APPROVED** supplier.

ADVICE & CUSTOMER SERVICE

The EGI team is readily available to assist customers at any stage, offering guidance on packaging solutions, box branding, and more. We are dedicated to providing prompt support, ensuring that all orders and queries receive a response within 24 hours.

DELIVERY SERVICE

We work with a select group of couriers to provide a fast and efficient delivery service. By obtaining live quotes from our couriers, we ensure that you receive the most competitive rates for each delivery, whether it's a box, half a pallet, or a full lorry load.

STOCK AVAILABILITY

At EGI we consistently maintain our stock levels to facilitate swift shipping. This ensures that all our customers can place orders with confidence and efficiently plan their ordering schedules.

FREE SAMPLES

EGI offer all customers free samples. This allows our customers to personally assess the quality of each product and conduct thorough testing before making a commitment.

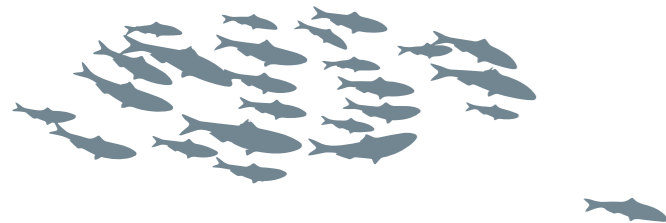

EGI AND THE PLANET

JUBILEE PARTNER

Alongside the Queen's Jubilee Trust, EGI have planted 500 trees and 600 hedges. As a business we try and create a closed loop with the resources we use.

GIVING BACK

At EGI, we are committed to giving back, and that's why we proudly support The Lewis Moody Foundation, Nicholls Spinal Injury Foundation, Naomi House, Jack's Place and MND Charities, as well as other local and national charities.

OUR ECO JOURNEY

Inspired by the profound impact of plastic pollution showcased in documentaries like Blue Planet, Managing Director - Natalie felt a responsibility to contribute to a greener, more sustainable future. In response to this environmental call-to-action, EGI was born, envisioned as an eco-friendly moulded fibre packaging alternative to plastic.

OUR AIM

At our core, our company's primary goal is to safeguard the '3 P's' – your Product, your Profits, and the Planet. We achieve this by developing strong products that eliminate plastic, polystyrene, and foam packaging from the equation, in favour of an eco-conscious alternative. Our products not only reduce plastic pollution but also prevent your items from becoming damaged waste, benefitting both your pocket and the planet.

OUR COMPANY ACTIONS

Sustainability is a shared responsibility, and at EGI, we are consistently taking steps to minimise our carbon footprint. Presently, all our products are manufactured and stored within a 30-mile radius, significantly lowering transportation-related carbon costs. Our warehouse operations are powered by electric vehicles, and our products are manufactured using only waste materials. EGI is committed to ongoing adaptations for a more sustainable business model, all while delivering products that contribute to your sustainability goals.

EGI understands that, although our products are crafted from waste cardboard, trees were cut down in the creation of this original material. With this awareness, as a company and as people, we are continually striving to enrich the natural environment.

REWILDING PROJECT

We have actively engaged in rewilding the local land by planting trees, hedgerows, and wildflowers. This project, in turn, creates habitats that provide food, homes, and safe shelters for a diverse range of animals.
